Sustainable Use Project Engagement

Developments since Vienna, 2015

European Sustainable Use Group (ESUG)

General Meeting of ESUG Wednesday, 24 June 2015

- Building on TESS & SYCL
- Sakernet
- Perdixnet
- Template for:
 - Mammalnet
 - Deer
 - Pigs
 - Hedgehogs, Badgers
 - Fisheriesnet
 - Others???

European Sustainable Use Group (ESUG)

IAF interested in addressing three issues

- 1. Conservation and Sustainable Use of Raptors.
- 2. Conservation and Sustainable Use of Prey.
- 3. Falconry and Conservation through Sustainable Use (of Raptors, Prey and Habitats) are threatened.

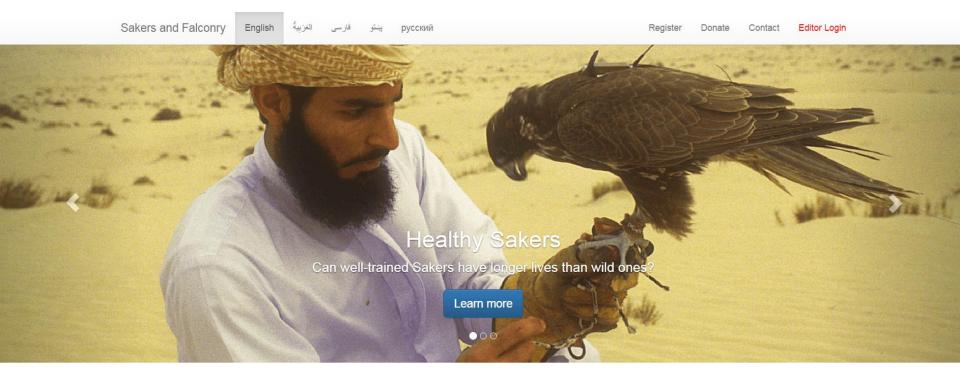

Encouraging action by Falconers, Farmers, Shooters and all other beneficiaries of wild resources to restore and cherish those resources for the future.

Building understanding by governments and public.

Get update alerts

We will send you news of when we update the site with new information about Sakers, falconry and conservation. Your registration will be separated from the survey, so that survey information is anonymous.

Register here

Do the survey

Please help us by completing the survey. Information that you give in the survey is important for management to maintain Saker numbers in the wild, and thus will help both trappers and falconers to sustain their activities.

Do the survey

See the survey results

Results of the survey will be presented as simple diagrams. The first diagrams from a previous survey done two years ago will be replaced as your information is added.

Saker Conservation and Falconry

This is web-site for the Saker Task Force (<u>STF</u>) set up under the Raptors MOU of the Convention on Conservation of Migratory Species (<u>CMS</u>). The site is run by the International Association for Falconry and Conservation of Birds of Prey (<u>IAF</u>), working together with CMS, <u>Birdlife</u> <u>International</u> and <u>IUCN</u>.

During 2012-14, the CMS-STF worked with researchers, falconers and other conservationists to draft a Saker Falcon Global Action Plan (<u>SakerGAP</u>), which was adopted by the CMS conference of parties at Quito, Ecuador in November 2014. The SakerGAP proposed flagship projects for managing and monitoring the species. This site, which provides information in English for researchers, veterinarians and other practitioners, is part of the first project. It links here in English to another part of this portal project, which is in Arabic, Pashto, Persian and Russian, for falconers, trappers and local land managers in Saker breeding areas. That site will carry the results of a survey which has now started to embrace in management and monitoring all those whose passion and livelihoods involve the Saker Falcon.

The site is also a resource for those wishing for links to Saker project information, to partners in this project and to reports and scientific articles on the Saker Falcon, including a bibliography of 844 papers. There is also a 2-page factsheet that gives a useful overview of the SakerGAP.

Restoring and Enriching Nature

The Aim

We would like this network to inspire you to restore nature and to inform you how to do it. To achieve this aim, we will work with governments that want you to enhance nature and not merely to leave it alone. We will help land-using business that seeks to conserve as well as to control nature. We will encourage volunteer affort and nature-based livelihoods to benefit wild resources. Our ethos is

Launching Perdixnet

Perdixnet has been built using knowledge from <u>50 years of research</u> on partridges and natural habitats by <u>Game and Wildlife</u> <u>Conservation Trust</u>, nearly 50 years of international networking by the <u>International Association for Falconry and</u> <u>Conservation of Birds of Prey</u> and 15 years of work towards helping local communities and land managers by <u>European</u> <u>Sustainable Use Group</u>. It will launch at national events during Autumn 2016. A launch for Europe will be in Brussels early in 2017.

After launch, this page will become a Calender of major Perdixnet events.

Wiederherstellung und Erhaltung der Artenvielfalt

Unser Ziel

Mit der Schaffung dieses Netzwerks möchten wir Sie dazu anregen, naturnahe Bedingungen wiederherzustellen. Außerdem möchten wir Ihnen Informationen an die Hand geben, wie das zu erreichen ist. Diesem Ziel zuliebe streben wir eine Zusammenarbeit mit Regierungen an, die die Natur fördern und nicht einfach den Dingen ihren Lauf lassen wollen. Wir möchten eine Form der Landnutzung unterstützen, die neben der Nutzung auch den Erhalt der Landschaft im Blick hat. Um natürliche Ressourcen zu fördern, unterstützen wir freiwilliges Engagement und naturverträgliche Lebensstile. Unser Ethos basiert auf den Artikeln der Berner Konvention, die die Aktivitäten in der Natur ganzheitlich fördern wollen. Wir befürworten die Nutzung der freien Natur mit vielen Facetten, denn nur, was sich selbst finanziell trägt, bleibt erhalten. Rebhühnern

European Sustainable Use Group (ESUG)

http://www.perdixnet.org

Systematik und Aussehen

Rebhühner gehören zur Ordnung der Hühnervögel und kommen in Europa in acht verschiedenen Unterarten vor, die sich sowohl genetisch als auch im Aussehen voneinander unterscheiden. In Deutschland lebt die Unterart *Perdix perdix* (Linné 1758). Rebhühner sind leicht von anderen Feldvögeln zu unterscheiden. Ihre Gestalt ist klein und gedrungen, der Kopf ist rund und wie die Kehle orangebraun

Über das Rebhuhn

- Aktueller Bestand
- Rückgangsursachen
- Rebhühner fördern
- Aufwertung von Lebensräumen
- Wiederansiedlung
- Fördermöglichkeiten
- Forschungs- und Schutzprojekte

Q

Effektiver Rebhuhnschutz muss auf großer Fläche umgesetzt werden und es ist wichtig, dass Akteure sich vernetzen können. Auf dieser Seite listen wir deshalb für Sie bestehende, kürzlich beendete und gerade entstehende Projekte. Die hinterlegten Links führen Sie zu Internetseiten oder Presseartikeln über Projekte und Initiativen zum Schutz des Rebhuhns.

Helfen Sie mit und melden Sie uns Projekte, die noch nicht aufgeführt sind.

European Sustainable Use Group (ESUG)

The PARTRIDGE project

Key objective

Facilitate long-term change to improve farmland biodiversity

- 1. On local and regional level
- 2. On national level
- 3. On European level

Farmers & other rural stakeholders

- Environmental agencies
- Influence next CAP

European Sustainable Use Group (ESUG)

The PARTRIDGE project

Protecting the Areas Resources Through Researched and Innovative Demonstration of Good Examples

What will we do

- 1. Show-case new solutions on ten 500ha demonstration farms what works for the Grey Partridge
- 2. Provide streamlined transnational monitoring systems provide evidence that our management plans work
- 3. Collect new information on socio-economic behaviours promote long-term change

increase the uptake and improve the design of AES

European Sustainable Use Group (ESUG)

PARTRIDGE Approach

How can we:

1) Get a wide range of rural stakeholders to work together?

2) Design and implement a management plan that suits farmland biodiversity in general?

by using the Grey Partridge as the bioindicator

Q

Welcome From Tanglewood! We are Airbnb "Superhosts"

Behind the scenes Winter Watch at Arne RSPB

26 Jan 2017

The RSPB is hosting the BBC Program Winter Watch down at the reserve on Ame, this is the second time that they have filmed from Ame. Unusal that they film twice from the same place this is testament to the value and volume of wild life there. I

was invited along with my fellow board members of Dorset's Local Nature Partnership

Looking for a quiet place to stay or bed and breakfast in the Purbecks?

Register

Look no further. Tanglewood is perfectly situated in the heart of the Purbecks for that relaxing break. Our address is

Tanglewood, Holme Lane, Wareham, BH20 5DH

Booking is easy (from £69/night). There is a choice of a large and comfortable guest suite (bedroom, bathroom, lounge-kitchenette), or a well-equipped Shepherd's Hut for more adventurous visitors. Book the <u>Shepherd's Hut</u> here. Like to know <u>more about us</u>? Or please feel free to contact us on

01929 550971

Tanglewood farmhouse has 4 acres of woods and streams and 12 acres of grassland. There are plenty of great places to see, in an area with beaches, undulating hills and the highest floral diversity in the UK, not to mention the <u>Jurassic Coast</u> and its <u>fossils</u>. Heathland is a local feature and specially protected European habitat, accessible on foot just 300 m from Tanglewood, or take another of <u>our</u> walks to Wareham a mile away. There are masses of other places to visit, with
